Whatever your need, aluminum radiators and intercoolers for racing, street rod, classic, muscle, exotic, or late model cars and trucks, and even industrial. Griffin has your aluminum radiator or intercooler in inventory or can build it to your exact specifications. Griffin maintains original templates of numerous car and truck radiators for several makes and models to ensure accuracy. Your Griffin radiator or charge air cooler is truly a performance heat exchanger, not an adaptation of an OEM product. In most cases it is a direct fit, bolt in replacement that is made to fit your vehicle, although sometimes requiring modifications due to core thickness.

Drag Race Radiators
