Drill Bit Sharpeners

Drill Doctor[®] Precision Drill Bit Sharpeners: See how saving drill bits pencils out for you...

Simple...

Sharpen drill bits almost as easily as you sharpen pencils.

Convenient...

Now you can have the convenience of properly sharpened drill bits whenever you need them. You'll never again have to delay a project because of a dull drill bit.

Precise...

The Drill Doctor[®] is made by Professional Tool Mfg. LLC. It uses the same proven technology as drill bit sharpeners costing thousands of dollars.

Fast...

The Drill Doctor[®] is fast. Sharpening a dull, worn drill bit to precision sharpness takes less than a minute.

Versatile...

The Drill Doctor[®] will re-sharpen carbide, high speed steel, standard, masonry, split point, cobalt, TiN coated and parabolic twist drill bits.

3 easy steps save you time and money

ALIGN

Place a drill bit into the chuck, then insert the chuck and drill bit into the alignment tube and tighten.

SHARPEN

Insert chucked drill bit into the sharpening tube and rotate clockwise to sharpen.

SPLIT

Move the chucked drill into the point splitting tube; insert to split the point on one flute, then rotate the chuck 180° and insert to split the point on the other flute.

You now have a self-centering and fast cutting
HIGH PERFORMANCE split point drill bit!

Specifications

Drill bit types:
two flute, fractional, metric,
number & letter sizes

Angles: 118° or 135°
Sharpening time 30-90 seconds
(depending on drill bit size)
